Managers' Compliance Representation	III
-------------------------------------	-----

Executive Summary

2nd Quarter 2022

The purpose of this report is to summarize Verus' evaluation of investment strategies managed on behalf of the Fresno County Employees Retirement Association ("The Association"). Specifically, the purpose of this report is to communicate the ongoing monitoring of compliance with stated investment guidelines.

The Association's portfolio is comprised of both commingled vehicles and separately managed accounts. All separate account investments have specific language within the guidelines for which each manager has committed to follow when managing the Association's investments. In order to obtain assurance that these separate accounts are managed in accordance with respective guidelines for each account, Verus obtains assurances from the compliance department at each investment manager. Enclosed are copies of such assurances.

Investments that are held in a commingled vehicle are typically governed by a partnership agreement or prospectus. The reason for this is that since commingled investment vehicles are designed to accommodate many different investors, only one common document may govern the strategy. For commingled investments Verus verifies compliance with investment guidelines through review of quarterly and/or annual reports, for which they are independently verified by third party accounting firms.

As of June 30, 2022, all managers reported compliance with their respective guidelines.

Jeffrey MacLean
Chief Executive Officer & Senior Consultant

Disclaimer

Verus has exercised all reasonable professional care in the evaluation of each investment manager's compliance to the Investment Policy and Guidelines of the Association as of the report date. This report is provided to the Board of Trustees in conjunction with our responsibilities under the investment consulting agreement. Appendix

Mondrian Emerging Markets Equity Fund, L.P.

Investment Strategy Detail	Initial
<p>Securities, Approach and Markets</p> <p>The Fund pursues its investment objective primarily by investing in equity securities of emerging market companies, as described below, that, in the Investment Manager's opinion, are undervalued at the time of purchase based on fundamental value analysis employed by the Investment Manager. Equity securities in which the Fund may invest include, but are not limited to, common stocks, preferred stocks, convertible securities, index related securities, certain non-traditional equity securities, 144A securities and warrants. The Fund may purchase securities of non-U.S. issuers directly or indirectly in the form of American, European or Global depository receipts or other securities representing underlying shares of non-U.S. issuers. The Fund may also purchase other investment funds, including, but not limited to registered funds, unregistered funds and REIT's. Under normal circumstances, the Fund invests at least 80% of its assets in investments of emerging market issuers.</p> <p>The Investment Manager's approach in selecting investments for the Fund is primarily oriented to individual stock selection and is value driven. In selecting stocks for the Fund, the Investment Manager identifies those stocks that it believes will provide capital appreciation over a market cycle, taking into consideration movements in the price of the individual security and the impact of currency fluctuation on a United States domiciled, dollar-based investor. The Investment Manager conducts fundamental research on a global basis in order to identify securities that, in the Investment Manager's opinion, have the potential for long-term capital appreciation. This research effort generally centers on a value-oriented dividend discount methodology with respect to individual securities and market analysis that isolates value across country boundaries. The approach focuses on future anticipated dividends and discounts the value of those dividends back to what they would be worth if they were being received today. In addition, the analysis typically includes a comparison of the values and current market prices of different possible investments. The Investment Manager's general management strategy emphasizes long-term holding of securities, although securities may be sold in the Investment Manager's discretion without regard to the length of time they have been held.</p>	
<p>Emerging Markets Equity Securities</p> <p>The Fund considers an emerging country to be any country that is included in the MSCI EM Index. In addition, any country which is generally recognized to be an emerging or developing country by the international financial community, including the World Bank, as well as any country that is classified by the United Nations or otherwise regarded by its authorities as developing will be considered an emerging country. Almost every nation in the world is included within this group of developing or emerging countries except the United States, Canada, and those in the Morgan Stanley Capital International EAFE Index.</p> <p>In considering possible emerging countries in which the Fund may invest, the Investment Manager places particular emphasis on certain factors, such as economic conditions (including growth trends, inflation rates and trade balances), regulatory and currency controls, accounting standards and political and social conditions.</p> <p>Although this is not an exclusive list, the Investment Manager considers an emerging country equity security to be one that is issued by a company that exhibits one or more of the following characteristics: (1) its principal securities trading market is in an emerging country, as defined above; (2) while traded in any market, alone or on a consolidated basis, the company derives 50% or more of its annual revenues or annual profits from either goods produced, sales made or services performed in emerging countries; (3) the company has 50% or more of its assets located in an emerging country; or (4) it is organized under the laws of, and has a</p>	

<p>principal office in, an emerging country. The Investment Manager determines eligibility based on publicly available information and inquiries made of the companies.</p> <p>Currently, investing in many emerging countries is not feasible, or may, in the Investment Manager's opinion, involve unacceptable political or governance risks. The Fund focuses its investments in those emerging countries where the Investment Manager considers the economies to be developing and where the markets are becoming more sophisticated.</p>	
<p>Currency, Debt Securities and Cash</p> <p>Currency considerations carry a special risk for a portfolio of international securities. The Fund may invest in securities issued in any currency and may hold foreign currency. Securities of issuers within a given country may be denominated in the currency of another country or in multinational currency units, including the euro. The Investment Manager primarily uses a purchasing power parity approach to evaluate currency risk. In this regard, the Fund may carry out hedging activities, and may invest in forward foreign currency contracts to hedge currency risks associated with the purchase of individual securities denominated in a particular currency. Under normal circumstances, hedging is undertaken defensively back into the base currency of the Fund.</p> <p>Under normal circumstances, no more than 10% of the Fund's assets will be invested in debt securities issued by governments or by their agencies, instrumentalities or political subdivisions, or by corporate entities, all of which may be high-yield, high-risk fixed income securities rated lower than BBB by S&P and Baa by Moody's or, if unrated, considered to be of equivalent quality. In addition, for temporary defensive purposes, the Fund may invest in high-quality debt instruments.</p> <p>To facilitate investment activities, the Fund will generally hold a small portion of its assets in cash or cash equivalent instruments.</p>	

The Investment Manager manages the Fund's assets in accordance with the investment objective and guidelines described in the Confidential Information Memorandum and not in accordance with the individual guidelines of any one investor.
